SUMMARY

Red-seal Journeyman Fitter/Welder of 14+ years. Industrial, commercial and residential construction with oil patch and agricultural experience provide me with valuable knowledge. Allowing proper time, safety and materials I am able to build and complete almost anything conceivable.

EMPLOYMENT HISTORY

Coil Solutions-Calgary, Ab. 2019-7 mos.

Redseal Journeyman Fitter/Welder

Cut, fit, fabricated parts and structural sections of coil tubing rigs.

Maintained a clean, safe work space and shop.

Worked on the assembly side of the shop with Mechanical Techs.

Retro fitted shop trailers and stands for the paint dept.

Attended new training when required.

Was one of the top 4 skilled all-position welders.

Winmar Disaster and Restoration-Swift Current, Sk. 2016-2 yrs.

Asbestose Abatement Tech./Restoration and skilled labor.

Helped run a 6 month remote asbestose abatement in Thompson, Manitoba.

Worked as a team to accomplish daily goals.

Knowledge and experience of hazardous chemicals and liquids and molds.

Removal of said issues and structural sections of buildings, and rebuilding back to new.

Customer interaction and satisfaction was extremely important.

Hot Stuff Gas and Oil-Cabri, Sk. 2014-2 yrs. 2 mos.

Redseal Journeyman Fitter/Welder.

Repaired and modified damaged trailers, trucks and farm equipment beyond spec.

Replacement and modification of trailer suspension, axles, jacks and hitches.

Engineered, fabricated and installed the tracks, brackets and plumbing for a 100 ft truck wash.

Engineered and fabricated skid-steer attachments for the wash bay cleaning.

Modified industrial and agricultural equipment for maximum operator safety.

Customer interaction and satisfaction was important in this rural area.

Crystal Clear Welding-Calgary, Ab. 2013-7 mos.

Redseal Journeyman Fitter/Welder

Heavily modified Transcontinental Printings building with no safety issues or shut downs.

Did all the structural modifications and parapet on the original B.M.O. downtown Calgary.

Multiple contracted structural jobs. Mostly assisting Iron workers on site.

Involved in every aspect of the jobs. From the shop fabrication to the field installation.

Contracted for U of C, and Shell on campus in high security areas with strict protocol.
